

1.Introduction

1.1 Overview

A. A brief description about project
tma or better known as Teach Me Anything is a education based website. More than a website, it is a community of educationist, mentors, students and anybody who want yo learn something new in his/her life. It is open-source contributor-seeker based website to focuses on exchange of educational material for free.

1.2 Purpose

The purpose of this website is to connect education seeker and educator via a platform and make educational material accessible for anybody irrespective of his/ her financial conditions, or any other factor. The website also aims at providing educators a platform to promote their educational websites, YouTube channels, share notes with their students without the hassle of where to go.

2. Literature survey

2.1 Existing problem

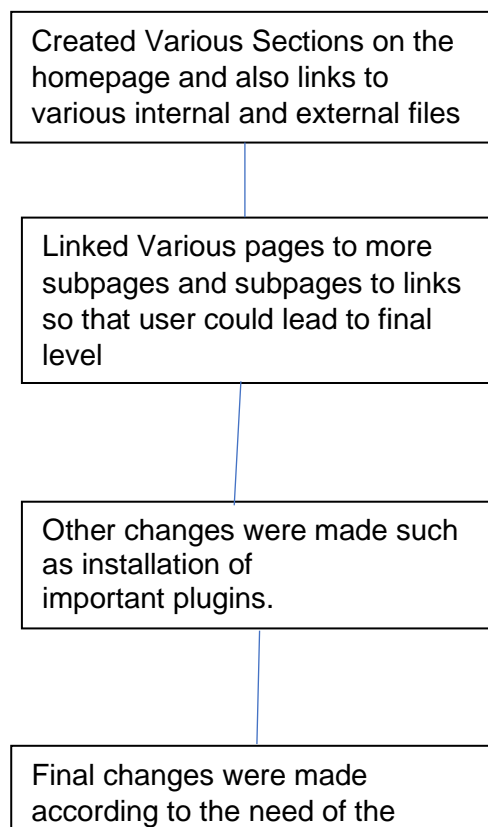

Many people want to access educational material for free but they only have \$0.4 dollars, just to buy a internet package and in such time they don't know where to go and what to do. Many Teachers wanted to share educational content to their students but are not use to to any platform, do not know what they could do, or how to promote their educational website.

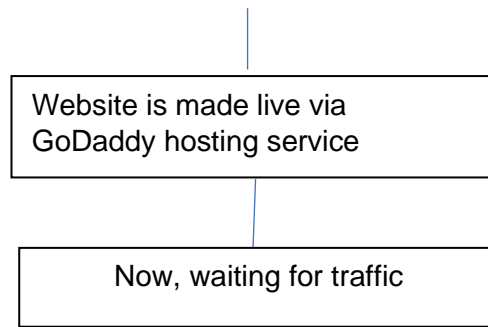

2.2 Proposed Solution

We provide a platform for such needy students by making them access the educational material for free of cost and just investing for internet which would hardly cost them any amount so to speak. Also, we provide a platform for openly sharing notes and other things related to education without demanding any marketing cost.

3. Theoretical Analysis

3.1 Block Diagram

3.2 Hardware/ Software Designing

Hardware: A laptop(most preferred)/ tablet/ phone with internet browser is the sole requirement of the website.

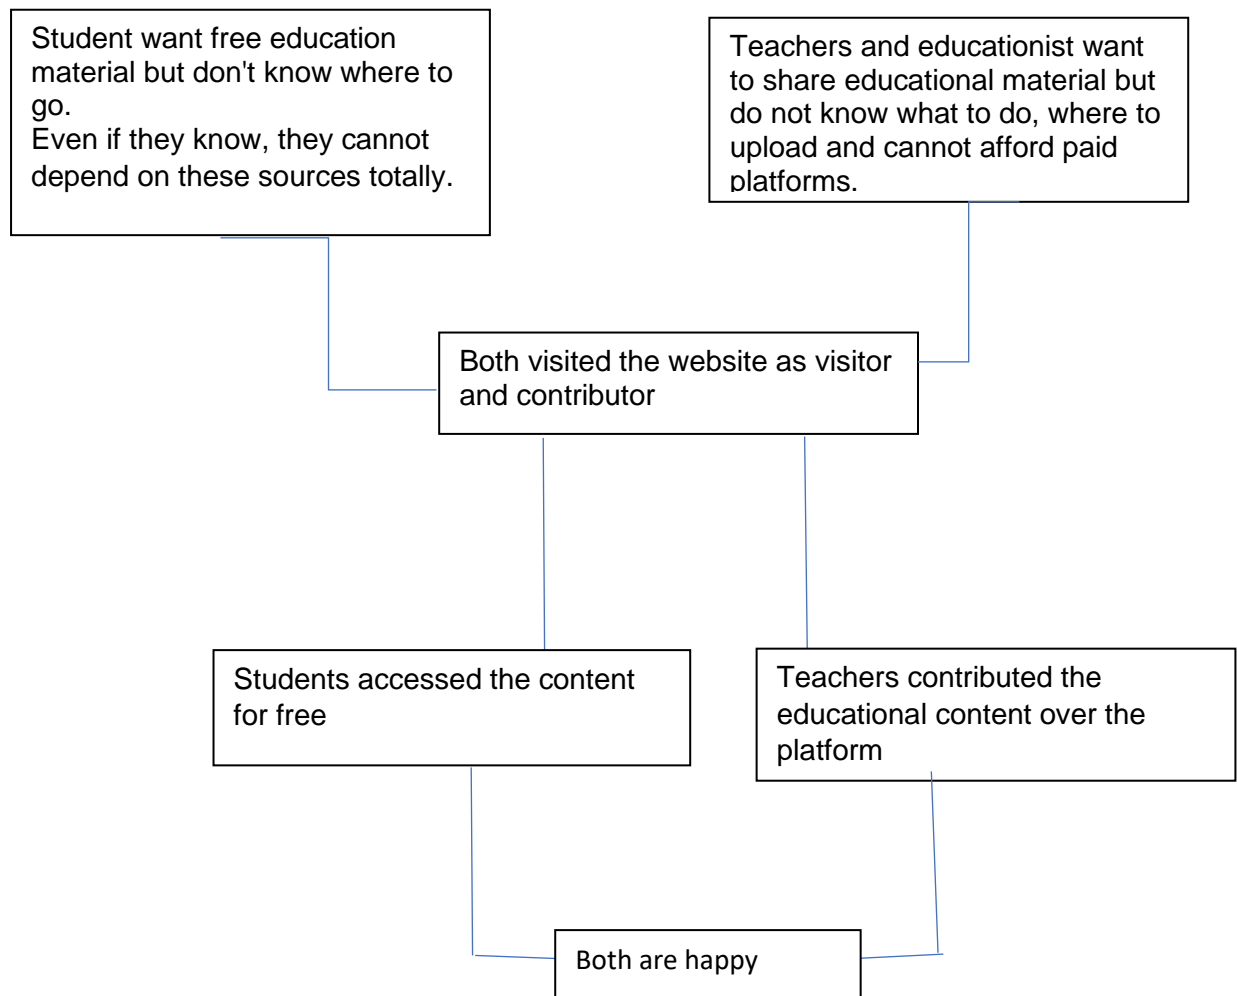

Software: Any specific software I not needed for this. However, a web browser is need for accessing the website.
